Track Pro  
Asset Tracking System

## Take ownership of your assets

### Locate. Track. Protect.

Save time and money by monitoring the location and movement of your assets and inventory with the ESCO® Track Pro portal and ruggedized tracking devices. Secure an ESCO Track Pro wireless tracking device to your valuable equipment and monitor it via the desktop portal or mobile application (iOS or Android).

### Applications

- Generators
- Skid steers
- Tools
- Vehicles
- Shipping containers
- Heavy equipment
- Buckets and attachments
- Dumpsters
- Light towers
- Rental equipment
- And more

Track all of your valuable equipment via  
the desktop portal or  
mobile application.

## Geofence alerts and a user-friendly interface provide customizable options

### Loss prevention

Protect your fleet with customizable geofences and alerts that notify you when an asset strays beyond a defined area. If equipment fitted with an ESCO Track Pro device is lost or stolen, simply use the app or desktop portal to determine the last known location to help direct the appropriate personnel to recover the item.

### Maximum asset utilization and field crew productivity

Have the right equipment, where you need it, when you need it. Get the most out of your field crew by empowering them to locate the closest available equipment – without the need to wander the yard, drive across town, or compromise safety and efficiency by substituting tools or equipment. ESCO Track Pro can also help identify any assets that have remained stagnant in the field – so you can relocate them to where they are needed.

#### Heavy-duty hardware

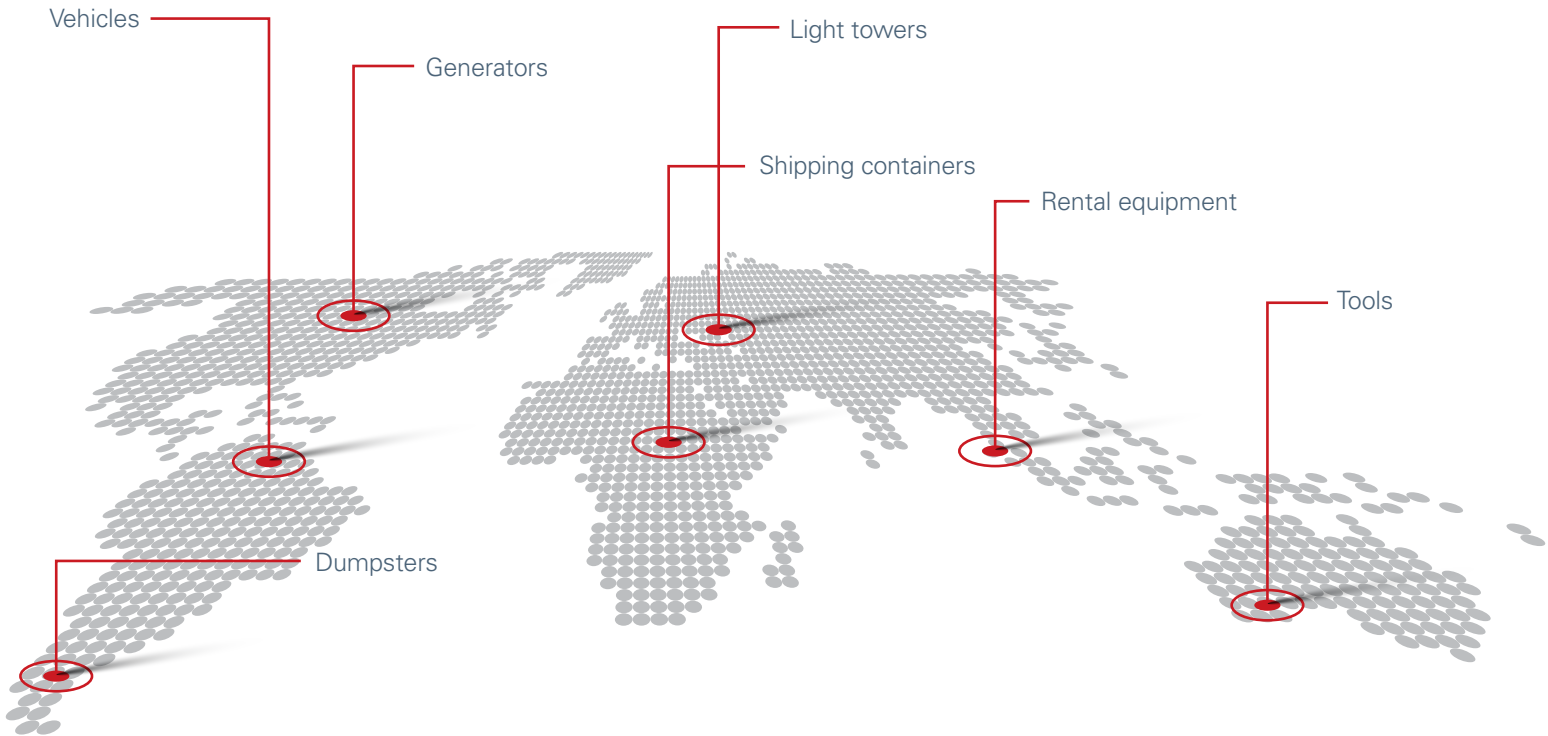

- Rated for industrial applications
- Weatherproof
- Long-life battery
- Choose from cellular, satellite or Bluetooth

#### Track software

- Mac or PC (cloud/browser-based)
- Mobile app (iOS or Android)

#### Worldwide coverage

## Save time and improve safety

### Less paperwork

Check-in and check-out assets and keep a photo log to record their condition. ESCO Track Pro can also store all relevant maintenance logs, user manuals, technical documentation in the cloud.

### Smarter buckets and attachments

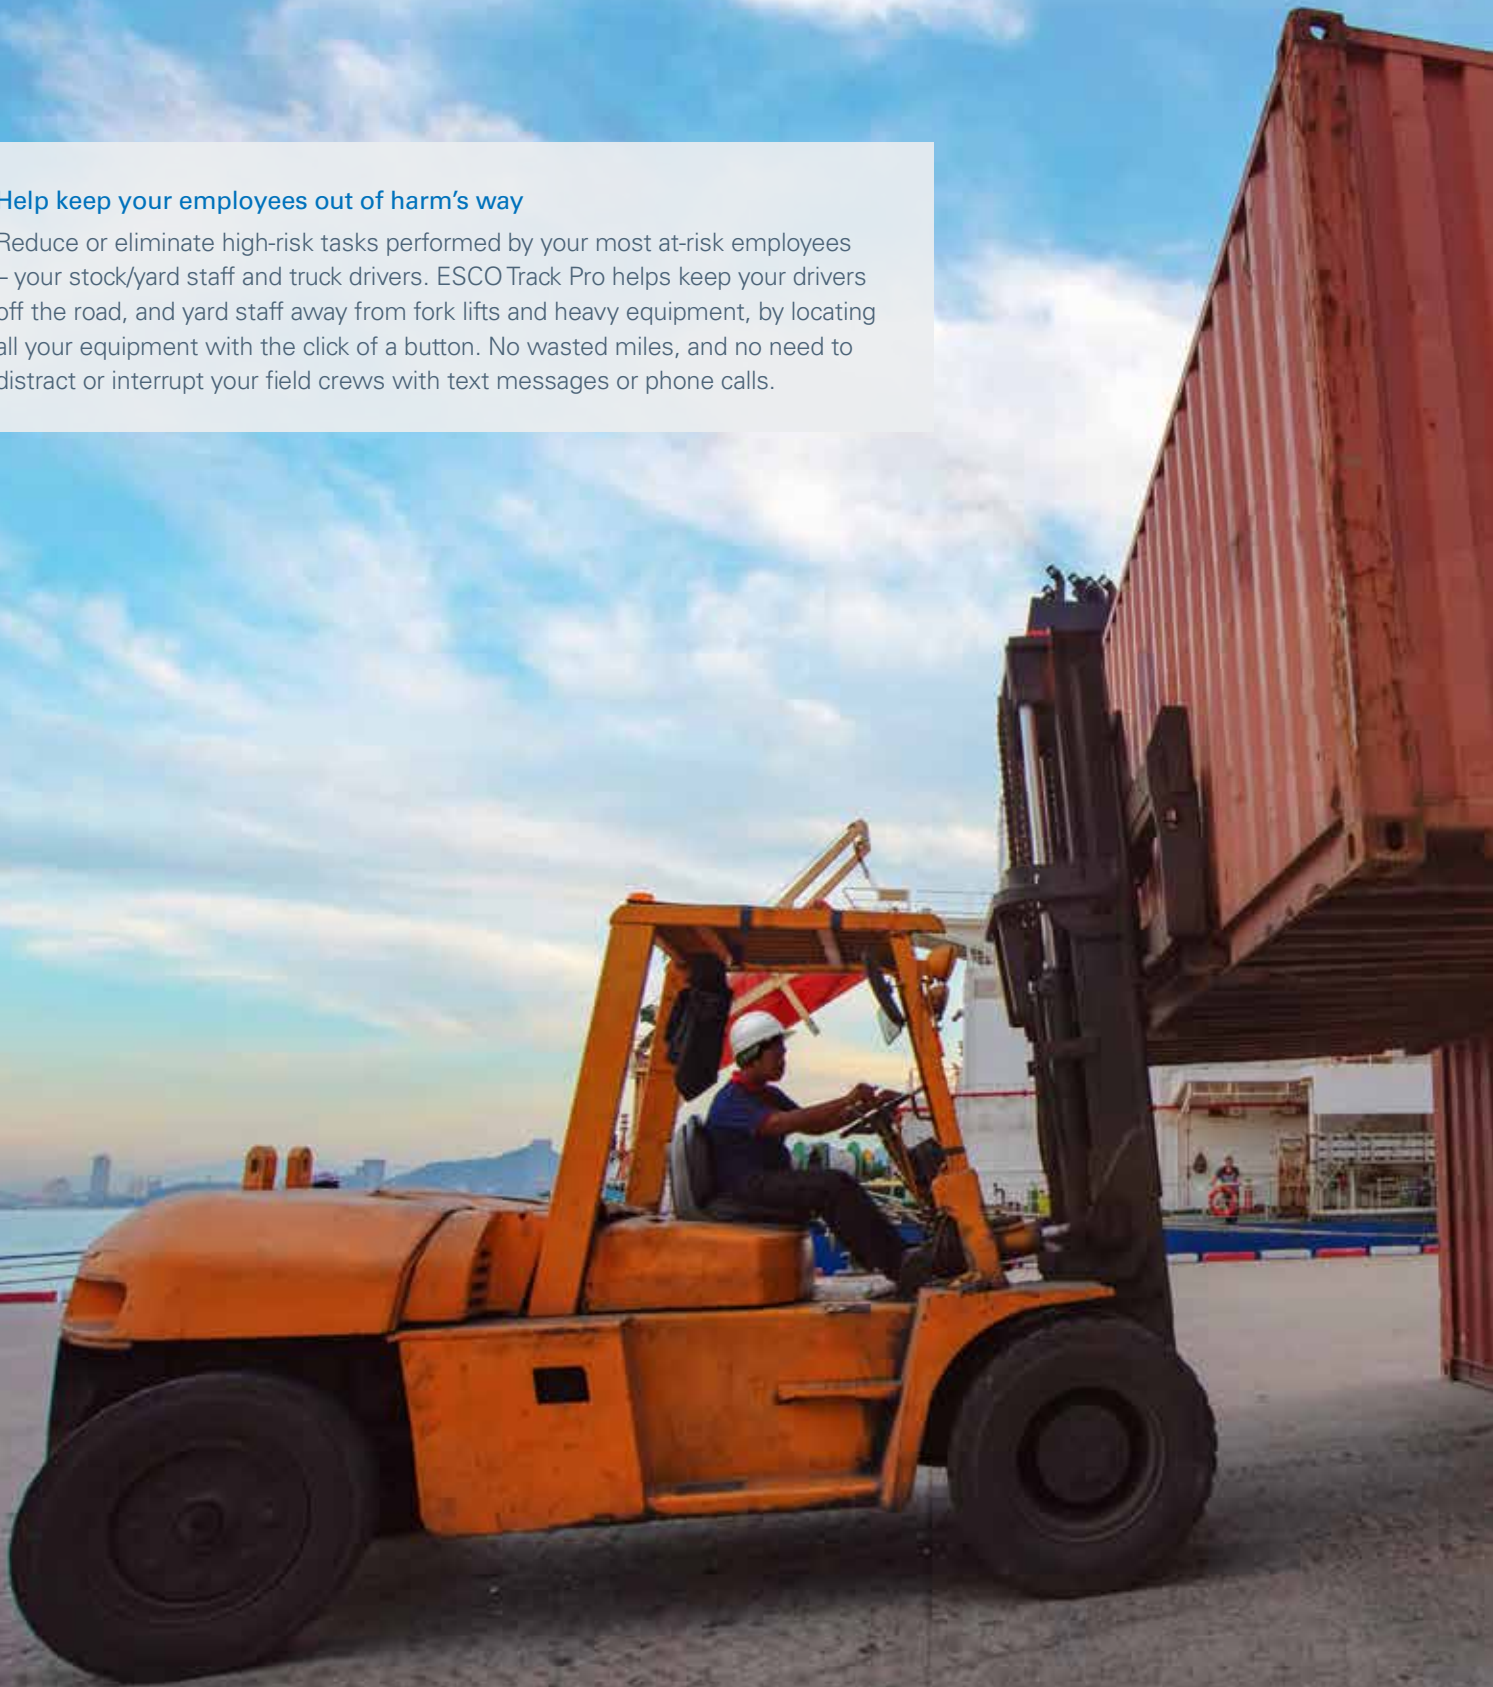

If you own or operate ESCO buckets and attachments, ESCO Track Pro can quickly identify replacement part numbers – and generate a shopping list that can be emailed to your purchasing manager or local ESCO dealer.

### Help keep your employees out of harm's way

Reduce or eliminate high-risk tasks performed by your most at-risk employees – your stock/yard staff and truck drivers. ESCO Track Pro helps keep your drivers off the road, and yard staff away from fork lifts and heavy equipment, by locating all your equipment with the click of a button. No wasted miles, and no need to distract or interrupt your field crews with text messages or phone calls.
